### Projects:

#### 1. [Rotating Image Gallery](#)

HTML | CSS | JS

- Implements a circular 3D image gallery with smooth rotation using CSS transform and JavaScript.
- Allows users to manually navigate the gallery with "Prev" and "Next" buttons.
- Features an automated rotation mechanism with a 3-second interval between transitions.
- Styled with CSS for a sleek, centered layout and interactive button hover effects.

#### 2. [Analog Clock](#)

HTML | CSS | JS

- Developed an analog clock using HTML, CSS, and JavaScript, showcasing dynamic time representation.
- Implemented real-time clock hands movement using JavaScript setInterval() and Date object.
- Designed a responsive UI with CSS for a visually appealing clock interface.
- Optimized the second hand's smooth transition using milliseconds for enhanced user experience.

#### 3. [Dictionary App](#)

HTML | CSS | JS

- Built an interactive Dictionary App using HTML, CSS, and JavaScript to fetch word meanings dynamically.
- Integrated the Dictionary API to retrieve and display word definitions, phonetics, and examples.
- Designed a user-friendly interface with responsive search functionality for enhanced usability.
- Implemented error handling for scenarios where the searched word is not found, ensuring robust performance.

#### 4. [Universe Solar System](#)

HTML | CSS | JS

- Designed a dynamic 3D solar system model using HTML, CSS, and JavaScript for educational and visualization purposes.
- Implemented realistic orbital animations for planets and moons with CSS keyframes and JavaScript.
- Enhanced visual appeal by creating a star-filled background and integrating planet textures.
- Optimized performance and interactivity with a scalable design and efficient DOM manipulation.
